SUMMARY

QA Engineer with 3+ years of experience delivering robust test automation and quality verification for high-volume FinTech systems, mobile applications (Android & iOS), and distributed payment APIs. Builds scalable test suites with Playwright, Appium, and Selenium WebDriver (TypeScript/Java), reducing regression cycles by 50% with zero P0 production escapes across 20+ releases. Deep domain expertise in NPCI UPI 2.0, multi-gateway payment processing, eKYC validation, and JMeter performance load testing. Open to relocation.

SKILLS

Test Automation	Playwright, Appium, Selenium WebDriver, TestNG, Page Object Model (POM), BDD, TypeScript, Java
QA Methodologies	Manual Testing, Functional, Regression, Smoke & Sanity, Integration, System, UAT, Exploratory Testing, Agile/Scrum, SDLC, STLC
API & Performance	Postman, Newman, REST APIs, JSON Schema, Apache JMeter (Load & Stress), Swagger
Defect & Test Management	Jira, TestRail, Zephyr, Root Cause Analysis (RCA), Test Planning, Test Strategy, Traceability Matrix
Tools & CI/CD	Git, GitHub, Jenkins, CI/CD Pipelines, Chrome DevTools
FinTech & Payments	NPCI UPI 2.0 (Intent/Collect), Payment Gateways (Razorpay, Cashfree), DigiLocker eKYC, LOS/LMS

EXPERIENCE

QA Engineer August 2026 – Present
Exude Vincom

- Architected scalable E2E test automation suites with Playwright and TypeScript, reducing verification time by 45%.
- Validated digital loan onboarding, multi-gateway payments, DigiLocker eKYC, and bank penny drop integrations.
- Executed functional, regression, and data integrity testing for Loan Origination & Management Systems (LOS/LMS).
- Tested backend webhook events and conversational AI edge cases to guarantee transaction synchronization.

QA Engineer July 2023 – August 2026
Paul Merchants

- Built hybrid mobile automation frameworks with Appium, Selenium, Java, and TestNG, accelerating regression by 50%.
- Tested NPCI UPI 2.0 flows (intent, collect, auto-reversals) and payment gateways across Android and iOS platforms.
- Performed API and stress testing using JMeter and Postman to ensure system stability under 500+ TPS load.
- Managed defect lifecycles in Jira utilizing Root Cause Analysis (RCA), achieving zero P0 production escapes.
- Led regulatory compliance testing, VAPT vulnerability remediation, and disaster recovery drills for card portals.

PUBLIC PROJECTS

- **PaulPay** (Wallet, cards, UPI): Manual and automated testing for a PPI wallet, virtual and physical cards, and UPI.
- **CredMe** (Lending): Loan application and customer journeys, including payments, DigiLocker eKYC, face verification, bank aggregation, penny drop, and eSign.

- **PaulOne** (Gold loan payments): Gold loan interest payments through Razorpay, before the product was acquired by L&T.
 - **Gifty** (Gift cards): Gift card issuance, redemption, and transactions, with UI and functional automation across platforms.
 - **Mayaa Money** (Digital gold and cards): Digital gold and silver transactions, plus prepaid card issuance, checked against the financial rules those products have to meet.
 - **Presenza** (HR and attendance): Employee attendance, punch in and out, leave, reimbursement, and the HR workflows those records sit on.
 - **PML Forex Live** (Forex and remittance): Forex buy and sell, outward remittance, and forex card flows on the web, priced from live city-wise rates.
-

EDUCATION

Bachelor of Computer Applications
Chandigarh Group of Colleges

2019 – 2022

CERTIFICATIONS AND COURSES

- Selenium with Java
- Appium with Java
- Playwright with JavaScript / TypeScript
- API Testing with Postman
- Stress and Performance Testing with JMeter
- Testing with GenAI
